

SINCOL

EST. 1943

Solutions for those who demand quality!

Manifest

In a world where every decision shapes our environmental legacy, we have chosen a path of positive impact. Committed to the certification of our forests, we are leading a concrete change in the preservation of global ecosystems. Our approach goes beyond standards to an unwavering commitment to ensuring that our responsible forest management practices not only protect but regenerate our natural environment. We are building a future where the integrity of forests reflects our care for the planet and its communities.

When you purchase **SINCOL products**, you helps us care for **the world's forest**.

History | Industry | FSC®

Recognized for the excellence and quality of its products, Sincol has established an international presence. With an exclusive product line dedicated to export, the brand reaches demanding markets such as the United States, France, the United Arab Emirates, Canada, Mexico, Italy, Denmark, Uruguay, as well as several countries in Central America, the Caribbean, and, of course, Brazil.

Founded on September 14, 1943, driven by the vision and determination of Mr. Caetano Balvedi, Sincol began as a small furniture factory, the result of hard work and entrepreneurial spirit. Over the years, the company evolved and became a national reference in the high-quality door manufacturing sector.

From an early stage, Sincol integrated sustainability as a core element of its organizational culture. In 1967, it launched its own reforestation project – a visionary initiative that anticipated future environmental concerns. This commitment was further strengthened in 1982 with the official creation of Reflorestadora Sincol, a milestone of pride for the entire company.

Since the 2000s, Reflorestadora Sincol has reaped the benefits of its continuous and responsible efforts. In pursuit of even greater quality and environmental responsibility in forest management, the company implemented the FSC® (Forest Stewardship Council®) certification, covering both forest management and the chain of custody – reinforcing its dedication to certified and sustainable practices.

Always striving for innovation and environmental responsibility, Sincol launched its self-generated energy program in 2020, utilizing industrial waste that was previously discarded. This initiative has reduced environmental impact and optimized resources in a smart and efficient manner.

With over 80 years of history marked by transformation, innovation, quality, and continuous growth, Sincol continues to open doors to remarkable achievements – with the same passion, responsibility, and excellence that have defined its journey since the beginning.

TEAK PANEL

Internationally recognized as one of the most prestigious and refined hardwoods, teak is synonymous with elegance and excellence. Its exceptional quality, combined with outstanding durability, offers lasting beauty—an investment designed to endure for generations.

Naturally resistant to fungi and pests, this natural treasure uniquely blends elegance, strength, and versatility. Its sophisticated tone and impeccable texture enhance interiors, elevate high-end design projects, and inspire the creation of exclusive furniture and décor pieces. Beyond its aesthetic appeal, teak's exceptional resistance to water, sunlight, and salt air makes it an essential material in demanding sectors such as shipbuilding, veneering, doors, panels, and premium design. Choosing teak means investing in beauty, performance, and enduring value.

GOURMET LINE - TEAK WOOD

A line dedicated to your kitchen.

Since 1967, Sincol Group has cultivated a strong commitment to the future. Across 218 farms and 96.000 acres of land, the company carefully nurtures an environment where nature takes center stage: 60% of this area is preserved as native forest and Permanent Preservation Areas (PPAs). Each year, approximately 2 million seedlings take root in this fertile soil, reaffirming a continuous cycle of respect, regeneration, and harmony between production and preservation.
